Description

At Olive Health & Travel Clinic we offer the full range of blood tests. Our nurses and phlebotomists can see you at any time during clinic hours or even offer you a home-visit to take your blood tests sample. Issuing of results will depend on the time samples have been taken. Results are normally issued within 48 hours for samples collected before 1pm, and 48-72 hours for samples collected after 1pm. Please note: Blood testing for Tuberculosis takes an additional day to process. Abnormal results should be referred to your GP for further management.
